EDUCATION

Bachelor of Science in Computer Science with Co-op

Toronto Metropolitan University

Sep. 2024 – Apr. 2028

Awards: 2024/2025 Dean's List in the Faculty of Science

Relevant Courses: Data Structures & Algorithms, Operating Systems, Web Development, Discrete Structures, Statistics, Calculus I, II, III

TECHNICAL SKILLS

Programming & Scripting:	Python (data manipulation, automation, scripting), Java (OOP), C/C++, React, Node.js, JavaScript, TypeScript, HTML/CSS, SQL, bash/shell scripting
Databases & Data Management:	MySQL, PostgreSQL, MongoDB (NoSQL, document modeling), query optimization, indexing, database design, data validation, ETL concepts
Libraries & Frameworks:	PyTorch, Pandas, NumPy, Django, REST APIs
Developer Tools & Practices:	Git/GitHub (version, CI/CD workflows), UI/UX Design, Figma, VS Code, SDLC, Agile/Scrum, JIRA, testing control practices, Linux/Unix environments, process improvement, Technical Problem Solving
Data Processing & Visualization:	Power BI (dashboards, reporting), Power Query, MS Office (Advanced), Tableau, data analysis, Matplotlib, statistical analysis, Excel (pivot tables, VBA macros), data quality assurance, stakeholder management

PROFESSIONAL EXPERIENCE

Clinical Administrator | Palermo Family Clinic, Palermo Professional

Dec. 2024 – Present

Oakville, ON

- Processed and maintained data for a database of over **1,000+** patients across multiple record systems, ensuring **100%** accuracy in billing, prescription authorizations, and insurance documentation, ensuring data integrity, regulatory compliance, and quality assurance across all administrative processes.
- Managed the clinic's end-to-end communication workflow, processing **40+** calls daily to schedule diagnostic and follow-up appointments while managing **15+** external documents daily, ensuring seamless data integration and process compliance across patient charts and electronic medical records.
- Using **data-driven analysis**, coordinated the check-in/out process for **15+** patients daily, reducing average wait times while managing paperwork, processing referrals, and delivering client-facing support through exceptional service and strict compliance with patient confidentiality regulations.
- Identified inefficiencies in administrative workflows and implemented a digitized patient intake process using **Excel-based** tracking templates, reducing new patient onboarding time by 30% and improving document retrieval efficiency across clinical and administrative teams.

Technical Marketing IEEE Computer Society | Dept. of Engineering, Toronto Metropolitan University

July 2025 – Present

Toronto, ON

- Defined and executed a multi-platform digital marketing strategy across **Instagram**, **LinkedIn**, and **direct mail**, running **A/B** testing on post timing, and format to optimize brand visibility by **15%** and total social engagement by **25%** across a **20-member** student chapter.
- Built and maintained weekly analytics reporting workflow using Instagram Insights and LinkedIn Analytics, tracking **KPIs** including follower growth (**+20%**), engagement rate (**+3.5%**), and event registration conversion rates to deliver data-driven recommendations and actionable insights to the executive board, informing strategic content decisions.
- Created a content calendar scheduling **10+** posts monthly using **Canva** for visual assets, coordinating with event organizers and **10+** industry sponsors to produce promotional materials for technical workshops (**C**, **SQL**, **Java**) and Industry Night hosting **15+** company representatives.
- Coordinated a **3-person** marketing team within a **20-member** executive board, managing deliverable timelines and cross-functional collaboration across design and outreach teams to produce and ship marketing assets for **3+** events per semester, ensuring all materials were delivered on time and within scope.

LEADERSHIP

Events Associate | BoostHER, Toronto Metropolitan University

Aug. 2025 – Present

Toronto, ON

- Planned and executed professional events for **50+** attendees per session, managing end-to-end logistics including venue booking, speaker coordination, and day-of operations using **Excel** for budget and attendance tracking, **Google Forms** for RSVP management, and **Discord** for cross-functional communication.
- Led sponsor and speaker outreach to **30+** organizations including companies and female-led small businesses, building stakeholder relationships while designing promotional materials in **Canva** and maintaining Excel-based attendance spreadsheets to analyze participation trends and drive continuous improvement across recurring events.

PROJECTS

Fortune Island | Python, PostgreSQL, Django, Phaser.js, HTML/CSS, JavaScript

February 2026

- Developed an RPG-style financial literacy game for children ages 7–12 in underrepresented communities at **ElleHacks 2026**, leading a development team to design and build a custom technology solution with gamified battle mechanics teaching saving, budgeting, and smart spending habits through interactive gameplay.
- Built full-stack application using **Phaser.js** game engine for the frontend with animated sprite-based interactions, **Django REST** backend with **PostgreSQL** database for persistent game state, and **Google Gemini API** for dynamic AI-generated financial literacy questions with adaptive difficulty scaling.

Robot Grip Simulation | Python, QUANSER, VNC Viewer, Microsoft Office

Jan. 2024 – Mar. 2024

- Developed and implemented a **Python**-based sorting algorithm in a **Quanser** virtual environment to identify and categorize randomized containers using real-time sensor data, achieving high classification accuracy and improving simulated sorting efficiency through iterative testing.
- Designed and documented a comprehensive testing methodology validating algorithm performance across randomized container configurations, analyzing edge cases for sensor misreads and collision detection, and delivering findings with detailed technical documentation and client-ready reporting.

Personal Portfolio Website | HTML/CSS, JavaScript, AOS Library, SVG

Dec. 2025 – Jan. 2026

- Designed and developed a fully responsive personal portfolio website from scratch to showcase projects and technical skills, applying structured development processes with mobile-first design principles and CSS media queries ensuring optimal rendering across all device sizes.
- Structured the codebase with clean, modular **HTML/CSS/JavaScript** architecture following semantic markup best practices, optimized page load performance, and deployed the site with custom domain configuration.
